

NARESH PARAB

Data Analyst | Python • SQL • Power BI • Excel • AI-Assisted Analytics

Pune, Maharashtra, India | +91 84460 72604 | parabnaresh15@gmail.com | linkedin.com/in/naresh-parab-56ab8129b | github.com/NareshParab

PROFESSIONAL SUMMARY

Data Analyst currently working as a Business Analyst at Gcarbon Private Limited, translating business requirements into reports, dashboards, and data-driven insights using Python, SQL, Power BI, and Excel. Comfortable across the analytics workflow — data cleaning, exploratory analysis, SQL querying, and interactive Power BI dashboards — with a growing focus on spotting trends and patterns in business data. Uses generative AI tools (ChatGPT, Claude, Gemini) to speed up research and explore analytical approaches, while independently checking results against the underlying data.

TECHNICAL SKILLS

Programming & Databases: Python, SQL, MySQL, C, C++

Python Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

BI & Visualization: Power BI (DAX, Power Query, Data Modeling, KPI Development), Microsoft Excel

Analytics: Data Cleaning, Data Wrangling, EDA, Trend & Pattern Analysis, Business Analysis, Dashboard Development

Tools: Git, GitHub, VS Code

AI-Assisted Analytics: Generative AI, Prompt Engineering, AI-Assisted Research & Data Exploration (ChatGPT, Claude, Gemini)

EXPERIENCE

Business Analyst — Gcarbon Private Limited

Apr 2026 – Present

- Analyze business processes and gather requirements from stakeholders, translating them into actionable insights for cross-functional, data-driven decision-making
- Build reports, dashboards, and presentations to track business performance and key metrics, and support process optimization and strategic planning for management

Data Scientist Intern — Skill Craft Technology

Dec 2024 (1 month)

- Worked with real-time datasets, performing data cleaning, preprocessing, and exploratory data analysis (EDA) using Pandas, NumPy, Matplotlib, and Seaborn

Data Analytics Trainee — PMKVY — Code First Technology

Apr – Jun 2025

- Cleaned and analyzed real-time datasets through EDA, and built analytical reports and Power BI dashboards using Pandas and NumPy

PROJECTS

GHG Emission Analytics Dashboard | Power BI, Power Query, DAX, Excel — [GitHub](#)

- Built a multi-page Power BI dashboard analyzing Scope 1, Scope 2, and Scope 3 GHG emissions, using Power Query for data transformation and DAX for emission KPIs
- Structured department- and source-level emission tracking (electricity, fuel, transport, waste, commuting) with monthly trend views to support ESG/sustainability reporting

Global Sales Data Analytics | Python, SQL (MySQL), Power BI — [GitHub](#)

- Cleaned and prepared a global sales dataset in Python (Pandas, NumPy) — fixed data types, handled missing values and duplicates, and engineered year/quarter/month fields for analysis
- Wrote MySQL queries using CTEs, window functions (RANK, LAG), and views to answer 20+ business questions: revenue by product/region/customer, month-over-month growth, and Gold/Silver/Bronze customer segmentation
- Built a 4-page Power BI dashboard (Executive Summary, Sales Trend, Product Performance, Customer & Geographic Analysis) with Power Query and DAX to visualize the SQL-driven insights

Mutual Fund Recommendation Dashboard | Power BI, DAX, Power Query — [GitHub](#)

- Developed an interactive Power BI dashboard for mutual fund analysis and recommendation, comparing 1-year, 3-year, and 5-year returns across fund categories and risk levels
- Built investor-profile filters (risk appetite, goal, duration, liquidity, ELSS preference) using DAX and Power Query to generate fund recommendations

E-commerce Sales Data Analysis | Python (Pandas, NumPy, Matplotlib, Seaborn) — [GitHub](#)

- Cleaned a sales dataset and engineered time-based features (month, quarter, day of week) to study revenue and profit patterns through EDA
- Visualized product, category, regional, and customer-segment performance, including a correlation heatmap to identify relationships driving profitability

EDUCATION

Bachelor of Computer Applications (BCA) — Specialization in Data Science

2023 – 2027 (Expected)

Sri Balaji University, Pune

Higher Secondary Certificate (HSC), Maharashtra State Board

2023

Secondary School Certificate (SSC), Maharashtra State Board

2021

ACHIEVEMENTS

- Selected to represent Sri Balaji University, Pune at the AIU (All India University) West Zone Men's Football Tournament, 2025
- Football player, Pune District Football Association (PDFA) — Team Khadki Blues
